Cabinet depth is the depth from the back side of the cabinet face frame to the back wall of the cabinet, look for anything in the back of the cabinet such as water or electric lines

Mounting type is determined by the type of shelf you have in your cabinet now.

Full Shelf includes 4 L brackets for mounting on an existing full depth shelf or the cabinet bottom

Half Shelf includes 2 L brackets in the rear for mounting on existing half depth shelves. The front will mount to the cabinet face frames or side wall on frameless cabinets

Rear mount includes 2 rear sockets to attach to the back wall in cabinets with no existing shelf and is for light to medium duty Side mount is for cabinets with no existing shelf and cabinet sidewalls that are sturdy enough to support the shelves

1/8", 3/8" and 1/2" spacers are available for Half, Rear and Side mount installations - request under special

You can Fax your order or order on-line at shelvesthatslide.com
